BIOGRAPHY

David Miller is Professor of Clinical Neurology at the Institute of Neurology, University College London and a Consultant Neurologist at the National Hospital for Neurology and Neurosurgery, UCLH, London. His major clinical activities and research interests are based on multiple sclerosis. He leads a multidisciplinary research group using magnetic resonance methods to improve diagnosis, identify prognostic markers, understand disease mechanisms and monitor new treatments in MS; the research has been principally supported by the MS Society of Great Britain and Northern Ireland. He has published extensively in peer reviewed medical literature and previously served as Secretary of the Association of British Neurologists and International Society of Magnetic Resonance in Medicine and as Co-Chief Editor of the Journal of Neurology. He has been a recipient of the Sobek Prize (2005) and Dystel Prize (2009) for MS research, and is currently the Secretary of ECTRIMS, a Senior Investigator of the NHS National Institute for Health Research, Fellow of the Academy of Medical Sciences and Honorary Professor in the Department of Medicine, University of Otago, Christchurch, New Zealand.
